NAME CHANGE

I have changed my name from Md. Moydul Haque Choudhary to Moydul Haque Choudhary before the Notary Public Kamrup at Amingaon. On dated 23.10.2019.

Sensex skids from record high as Moody's cuts India credit outlook

MUMBAI, NOV 8: Equity benchmark BSE Sensex tumbled 330 points on Friday as investors pressed the exit button after Moody's cut India's credit rating outlook citing growth concerns. Profit-booking following the recent record-setting run and unease over frothy valuations also took their toll, analysts said. Trading on a weak note though the day, the 30-share Sensex briefly turned positive to hit a fresh intra-day high of 40,749.33, but failed to sustain the momentum. It finally ended 330.13 points, or 0.81 per cent lower at 40,323.61. Similarly, the broader NSE Nifty plunged 103.90 points, or 0.86 per cent, to end at 11,908.15. The Sensex had closed at fresh lifetime highs in three of the five sessions this week, while the Nifty had reclaimed the key 12,000-mark after five months. During the action-packed week,

the Sensex advanced 158.58 points or 0.39 per cent, and the Nifty inched up 17.55 points or 0.14 per cent. Top losers in the Sensex pack on Friday included Sun Pharma, Vedanta, ONGC, TCS, HUL, ITC, NTPC, Asian Paints and Infosys, shedding up to 4.23 per cent. On the other hand, Yes Bank, IndusInd Bank, ICICI Bank, Kotak Bank, Tech Mahindra and HCL Tech rose up to 3.76 per cent. Moody's Investors Service cut country's credit rating outlook to negative -- the first step towards a downgrade, saying the government has been partly ineffective in addressing economic weakness, leading to rising risks that growth will remain low. The Indian rupee too depreciated 33 paise to 71.30 against the US dollar intra-day. "Rating downgrade forced investors to book profit in a volatile

market and rupee weakened to 3-week low. Given the subdued performance of the equity market during the year, MF inflows fell to four-month low while premium valuation of large and blue-chips is not attracting new funds in the market," said Vinod Nair, Head of Research, Geojit Financial Services. Sectorally, BSE FMCG, metal, oil and gas, healthcare, IT, tech, telecom and power indices fell up to 1.80 per cent. BSE realty, bank and consumer durables indices rose up to 1.55 per cent. Broader BSE midcap and smallcap indices too ended up to 0.79 per cent lower. Meanwhile, MSCI, the world's biggest index compiler, has added eight Indian stocks including HDFC Asset Management, Info Edge (India) and Indraprastha Gas Ltd to its India Index, while removing Vodafone Idea, Yes Bank, BHEL, Glenmark

Pharmaceuticals, Indiabulls Housing Finance and L&T Finance Holdings. MSCI also added seven stocks and deleted four from MSCI Global Standard Index. The additions include Berger Paints, Colgate, DLF, HDFC AMC, ICICI Prudential Life, SBI Life, and Siemens. The deletions from the global index include Glenmark, Indiabulls Housing, Vodafone Idea, and Yes Bank. On the global front, markets wavered amid lack of concrete progress on the US-China trade negotiations. Bourses in Shanghai, Hong Kong and Seoul settled on a negative note, while Tokyo ended in the green. Exchanges in Europe too were trading lower in their respective early deals. Brent crude futures, the global oil benchmark, fell 1.24 per cent to USD 61.53 per barrel. Agencies

India's diesel exports to weigh on Asia's refining margins

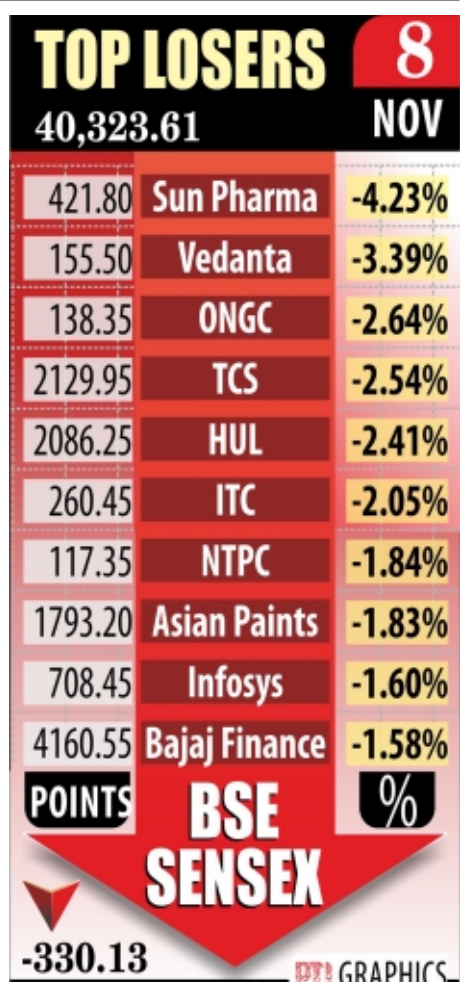

MUMBAI/SINGAPORE, NOV 8: Higher diesel exports from India will likely weigh on refining profit margins in Asia, analysts and traders said, as fuel demand growth is set to fall to its lowest in at least six years as the country's economy stutters. India's state-owned refiners, such as Indian Oil Corp (IOC.NS), Bharat Petroleum Crop (BPCL.NS) and Hindustan Petroleum Corp (HPCL.NS), used to buy in supplies from private companies to meet demand at the pump. But a decline in diesel consumption, which accounts for about two-fifths of overall fuel demand, means that Bharat Petroleum Corp will export about 200,000 tonnes of diesel every month between November to March, its head of finance N. Vijayagopal said on Friday. "We do not expect growth in diesel demand to improve any time soon, at least in this quarter and the next. So if the growth is going to be negative till the end of March 2020, then we will have to export diesel," Vijayagopal told a news conference. Moody's Investors Service lowered India's ratings outlook to "negative" from "stable" on Friday, warning of lower economic growth. "Higher diesel exports from India will definitely weigh on Asian margins," said Senthil Kumar, oil markets consultant with Singapore-based consultancy FGE, which has cut its forecast for diesel demand in India by a third to 40,000 barrels per day in 2019. Diesel cracks that had strengthened in anticipation of new marine fuel norms from January 2020 have eased since the start of September. Asian refining profit margins for gasoil with 10ppm sulphur content GO10SGCKM1 were at \$15.34 a barrel over Dubai crude on Friday. The cracks for the benchmark gasoil grade in Singapore have shed about 20% since hitting a 4-1/2 year high of \$19.14 a barrel in September.State-run Indian Oil Corp (IOC.NS) and Mangalore Refinery and Petrochemicals (MRPL.NS) have also increased diesel exports. "It does sound like a gasoil flood coming out of India... this would suppress the Asian gasoil cracks further," according to a Singapore-based gasoil trader. Asia's third-largest economy expanded by just 5% in the June quarter, its slowest pace since 2013. Consumption of gasoil in an emerging economy such as India is linked to sectors such as automotive, that determine the nation's overall growth, FGE's Kumar said. Agencies

No levying of charges on NEFT payment from Jan: RBI to banks

MUMBAI, NOV 8: Come January 2020, and customers may not have to pay any charges for transactions done through the popular NEFT system. A proposal in this regard has been mooted by the RBI to give impetus to digital transactions on the third anniversary of demonetisation. The central bank has also proposed that FASTags would be enabled to pay for parking fee and even at fuel stations. Digital payments constituted a high 96 per cent of total non-cash retail payments during the October 2018 to September 2019. During the same period, the National Electronic Funds Transfer (NEFT) and Unified Payments Interface (UPI) systems handled 252 crore and 874 crore transactions with year on year growth of 20 per cent and 263 per cent, respectively. "This rapid growth in the payment systems, inter-alia, has been facilitated by a series of measures taken by the Reserve

Bank of India," the central bank said in a statement on furthering digital payments. Now to further empower every citizen with an "Exceptional (e) Payment Experience", and provide her access to a bouquet of options, the RBI said it proposes to "mandate banks not to charge savings bank account customers for online transactions in the NEFT system with effect from January 2020". It also plans to operationalise the "Acceptance Development Fund" to increase acceptance infrastructure with from January 1, 2020. A committee would also be set up to assess the need for plurality of QR codes and merits of their co-existence or convergence from both systemic and consumer viewpoints. Further, the central bank has plans to permit all authorised payment systems and instruments (non-bank PPIs, cards and UPI) for linking with National Electronic Toll Collection (NETC) FASTags.

"Going forward, this will facilitate the use of FASTags for parking, fuel, etc., payments in an interoperable environment," the statement said. The RBI announcement comes on the third anniversary of government's historic decision to demonetise Rs 500/1,000. On November 8, 2016 the then Rs 500 and Rs 1,000 in circulation were banned, and the RBI came out with new 2,000 and 500 currency notes. The Reserve Bank of India further said the benchmarking exercise undertaken by it reveals a high position enjoyed by the country in various parameters in the payment systems. The banking regulator said it has facilitated acceptance of RuPay cards in Bhutan and will actively engage with the payment system regulators in other jurisdictions and share its experience to derive synergies and reduce the cost and time taken for inward remittances, especially in key remittance corridors. Agencies

Govt's MMTTC to import substantial quantity of onions to check price rise

NEW DELHI, NOV 8: To keep a lid on rising retail prices of onion which have skyrocketed up to Rs 100 per kg, the Centre on Friday decided to import "substantial" quantity of the key kitchen staple from Dubai and other countries to augment the domestic availability. State-run trading agency MMTTC has issued a tender in this regard, it said. This is the second tender the agency has floated. It had not received response from the bidders for the first tender issued for import of 2,000 tonnes. A decision in this regard was taken at a high-level meeting headed by Cabinet Secretary Rajiv Gauba. Consumer Affairs Secretary Avinash K Srivastava was present. Onion prices have risen sharply for more than a month due to tight supply. The retail prices have increased up to Rs 100 per kg in the national capital and ruling in the range of Rs 60-80 per kg in other parts of the country, as per the trade data.

"MMTC has been requested to immediately import a substantial amount of onions from Dubai and other countries to augment domestic supplies. A tender for the same has been issued," the consumer affairs ministry said in a statement. An approval has been granted to reduce the mandatory time for tendering as there is an immediate and prompt requirement domestically, it added. A team comprising officials from MMTTC, cooperative NAFED as well as agriculture and consumer affairs ministries has been directed to visit Turkey and Egypt on an urgent basis to take stock of the supplies of onions in these countries and facilitate imports to India, it added. Meanwhile, the government is also trying to facilitate import of onion through private traders from Egypt, Iran, Turkey and Afghanistan, for which phytosanitary and fumigation norms have been liberalised till November 30. In a statement, the consumer af-

fairs ministry said the NAFED has been directed to speed up its domestic procurement process especially from Alwar in Rajasthan and supply to states that have already indicated their demand. So far, a total of 300 tonnes of onions per day have been demanded which will be progressively increased as per the increased demands of state governments, it said. NAFED has also been asked to provide maximum quantity so as to ensure a healthy supply to onion-deficient states. The cooperative body is being facilitated to procure the same. That apart, the Delhi and Rajasthan governments have been directed to keep their mandis open from November 9-12 so as to prevent any disruption in supplies. They have also been asked to provide appropriate publicity for the same. "The government is constantly in touch with state governments to ensure that their demands are be-

ing catered to," the ministry said. The Centre is holding consultations with state governments through video conference to assess demands and requirements along with supply position. Based on their demands, NAFED has been asked to procure and supply. Another video conference was held on Friday along with agriculture/horticulture departments of state governments to further take stock of the situation, it said. The government said strict and appropriate action will be taken against traders in Delhi, Maharashtra and Rajasthan who are trying to manipulate the prices. The Department of Consumer Affairs is constantly and closely monitoring the availability and prices of onions across the country, it added. Onion prices have risen due to 30-40 per cent fall in the domestic production of kharif (summer) onion owing to heavy rains in the main growing states of Maharashtra and Karnataka. Agencies

Suzuki rethinks promise of India's auto market

NEW DELHI, NOV 8: Suzuki Motor Corp (7269.T) said it was no longer gung-ho about India's auto market, the world's fourth-largest, where it has seen relentless growth in the past seven years. And the parent of the country's biggest car maker is not alone. The Japanese automaker issued the warning after it reported a slump in quarterly profit this week on tumbling sales at its Indian unit, Maruti Suzuki (MRTI.NS), which accounts for half the number of cars sold in India. "We no longer think that growth in India will be an uninterrupted move upwards," Suzuki President Toshihiro Suzuki cautioned. Maruti's sales, which were growing till January, has slipped every month over February-September 2019. India's auto sector has gone into a tailspin this year as tight liquidity at shadow banks, high

taxes and a weak rural economy have sapped consumers' buying power. Global players like Ford (F.N), Volkswagen (VOWG.DE) and Fiat (FCHA.MI) are already re-evaluating their strategy as they struggle to make inroads in a market dominated by small cars. "Car makers are getting very cautious regarding their future investments in India. Most of

them are either deferring or just scrapping their India new model plans," said Puneet Gupta, an autos sector expert at IHS Markit. Auto executives and analysts point out that some car makers are focussing on their strengths in terms of products instead of chasing volumes with small cars. Some others are taking drastic steps to reduce their ex-

posure. Ford (F.N) has agreed to sell a majority stake in its India arm to Mahindra & Mahindra (MAHM.NS), ending its independent operations in the country after two decades and highlighting the challenges automakers face in growing profitably in Asia's third-largest economy. DIALLING BACK A cocktail of higher taxes under a new goods and services tax regime, flip-flop over electric-vehicle policy, and a boom of ride-sharing firms such as Uber and Ola have all plagued global automakers in India. Not having the right cars and smaller sales network have also hurt, some executives say. "When you have policy instability it becomes very hard to convince headquarters to invest more in the country," an executive at a western automaker said. India is largely a small-car market and that is not a strength for

most global automakers, who sell more SUVs and luxury cars elsewhere such as in China and the United States - the world's top two car markets, the executive added. Western automakers had to design products specifically for India which is an expensive exercise, said V.G. Ramakrishnan, managing partner at consultancy Avanteum Advisors. "Many chose a mass-market strategy instead of a niche one," and are dialling back to focus on specific segments, he said. Volkswagen has put its sister company Skoda in charge of India strategy and will focus on SUVs. Fiat (FCHA.MI) too has put SUV-maker Jeep in charge of driving sales in the country. Demand for SUVs in India is growing faster than some small car segments, prompting even the likes of Maruti that dominates the small-car space to look at launching SUVs and crossovers. Agencies
